Initial Report

Officer P20 PAUL, JEFFREY M. Date 10/23/2014

On 10-23-14, I (Ofc. Paul) was dispatched to the IVCH ER for report of a possible child abuse/assault. Upon arrival, I spoke with ER Nurse Ashley Freitag who related that a woman, later identified as Julia Eickmeier, brought her one year old daughter Madeline Kramer in for an exam. Eickmeier said that she suspected possible sexual abuse/assault by the father Kevin Kramer. Freitag said she and Dr. Sergey Golber examined Madeline and believe that she had a diaper rash but there were no signs of any abuse or assault. Due to the allegations, Freitag contacted police. Freitag also reported the incident to DCFS. They advised her that the incident would be documented but no investigation would be completed due to the medical professionals exam results.

I then spoke with Eickmeier and her boyfriend Adrian Perez. They related that since the time Madeline was seven months old until now that she is twenty one months old, they have noticed behavior changes along with physical signs of possible abuse. Eickmeier described the behavior as almost a sexual fetish. She said after visitation with Kramer, Madeline would cross her legs, pull on her diaper, grab her vaginal area and cry when having her diaper changed. Madeline has also put her hands down Eickmeier's pants and grabbed her genital area as well. She described the physical signs as severe darkening redness and swelling around the vaginal area. Eickmeier said she has made approximately fifteen to twenty reports of this in the past to various hospitals, police agencies and DCFS. She was told that the incidents would be documented but no investigation would be completed without confirmation from a health care provider. She said none of the doctors have been willing to testify that there were signs of abuse. Eickmeier has asked Kramer about the incidents and he replies that he doesn't know what she is taking about. Kramer then becomes upset about her questioning him. Eickmeier has talked to Kramer about proper care and diaper changing but does not believe this is causing the irritation. Eickmeier said she has documented the times when Madeline has

- continued

irritation in her genital area and it is not consistent with normal diaper changing. She said she has never observed this type of irritation any time other than when Madeline has visited Kramer.

I requested Eickmeier and Perez to complete written statements of the incidents.

I then spoke with Dr. Golber who related that he has seen many cases of abuse/assault. He said in this case he believes the irritation is due to diaper rash and sees no signs of any assault. Golber said he can not rule out the possibility that Madeline was assaulted however there is no evidence to indicate it at this time.

I contacted Kramer and advised him of the report. I requested that he come to the station for an interview to which he agreed. Kramer said he would be glad to cooperate but this was becoming ridiculous. He said Eickmeier has reported this abuse several times with no basis. He said he has never abused his daughter.

Later in the shift Kramer arrived at the station. We entered the interview room and I advised him of his Miranda Warnings. I advised that the interview would be audio and video recorded. Kramer initialed and signed the waiver form before agreeing to speak with me. I explained the concerns of Eickmeier and the examination. Kramer said he had custody of Madeline from 12:00 to 17:00 today. She had the diaper rash at the time he got her. Kramer did not have any cream for the rash and changed her three times throughout the day. He thought everything appeared normal other than the rash. He said the rash was much more than normal and covered a larger area. Normally the rash is smaller and only on Madeline's rear. This is a regular occurrence about once a month. Kramer said he and Eickmeier are the only ones that watch Madeline on a regular basis. Kramer's parents used to watch Madeline until Eickmeier accused his mother of wiping her too hard when changing her diaper. They talked about the rash today when he picked her up. Eickmeier said she had been putting cream on it but it did not appear there was any on her at the time nor did Eickmeier put any on while she changed her. Kramer said he was concerned for Eickmeier's mental health as she continues to make these allegations against him. She has gone to the Princeton Hospital and the Peoria Hospital in the past with the same claims of abuse. Eickmeier tells him that she believes when children grab their diaper or squeeze it together between their legs it is to stimulate themselves sexually. He believes that this is due to irritation or just part of her normal development and is not in any way sexual. DCFS has contacted Kramer previously regarding this issue and has determined the claims to be unfounded. Kramer said he was very stressed about the continual accusations and subsequent questioning by various agencies. He wants to have a normal relationship with his daughter but Eickmeier is making it extremely difficult. He said he feels that he is being harassed by her actions.

I explained that this incident would be documented and DCFS would be advised. I suggested that Kramer continue providing care with his daughter's best interest in mind.

I contacted DCFS Caseworker Jake Walters and advised him of this incident. Walters said this would be documented with no investigation due to lack of medical indications of abuse. The intake report number was
